ABHIRAM LANKA

Talent Acquisition · Recruitment Operations · Client Partnerships

Visakhapatnam, AP | 9556925563 | lankaabhiram16@gmail.com | github.com/Abhiram-ops
abhiram-ops.github.io/abhiramportfolio

PROFESSIONAL SUMMARY

Talent acquisition and recruitment operations professional with close to two years of experience across agency-side recruitment and campus talent partnerships. Manages enterprise client accounts spanning EdTech, BPO and SaaS — including NxtWave, Alorica, Transcom, Scaler and Codingal — and owns delivery end to end: structured screening design, candidate pre-vetting, offer management and onboarding. Leads a recruiter team against daily closure SLAs and has reduced client hiring turnaround through sourcing-channel redesign. Promoted to Growth Consultant at OpenHire in October 2026, after an eight-month operations-focused internship. B.Tech in Computer Science Engineering from Andhra University, enabling credible technical screening for engineering and product roles. Seeking a talent acquisition or HR operations role within a large-scale, structured hiring environment.

SKILLS

Talent Acquisition: End-to-End Recruitment, Candidate Sourcing & Screening, Structured Interview Design, Competency-Based Assessment, Pre-Vetting & Shortlisting, Volume and Niche Hiring, Interview Coordination, Offer Management, Employment Documentation, Onboarding & Induction

Recruitment Operations: Requisition & Pipeline Management, SLA and TAT Governance, Sourcing-Channel Strategy, Recruiter Team Management, Stakeholder Management, Client Account Management, Job Portals (Naukri, LinkedIn Recruiter), ATS & CRM Administration, Recruitment Reporting

Analysis & Systems: Advanced Excel (Pivot Tables, XLOOKUP), SQL, Power BI, Process Documentation, Workflow Automation, Agile / Jira

Technical Foundation: Python, Java, JavaScript, React, SQL, AWS (IAM, S3, Lambda), Cybersecurity Fundamentals (OWASP Top 10, Vulnerability Assessment), Penetration Testing

EXPERIENCE

OpenHire | Growth Consultant *Oct 2026 – Present*

- Transitioned from an internship-track operations role into a full-time Growth Consultant position at OpenHire.
- Own business development, outreach strategy and client acquisition for the firm's recruitment mandates.
- Continue to support delivery operations across active client accounts alongside the founder.

OpenHire | Growth & Operations Manager (Internship) *Feb 2026 – Oct 2026*

- Managed enterprise client accounts across EdTech, BPO and SaaS sectors — including NxtWave, Alorica, Transcom, Scaler and Codingal — partnering with the founder to expand delivery across 10+ industries.
- Owned recruitment delivery for high-intensity roles spanning International Sales, Field Operations and SaaS Business Development, from requirement intake through to offer closure.
- Designed the structured screening instruments used across the recruitment team — role-specific interview guides and call scripts assessing target attainment, conversion performance, objection handling and pipeline discipline.
- Reduced client hiring turnaround time by restructuring sourcing channels and introducing pre-vetted candidate pipelines for niche sectors including EdTech and waste management.
- Managed the recruiter team's daily requisition flow across job portals and direct sourcing, operating to a same-day closure SLA and escalating client-side delays.
- Hired and onboarded OpenHire's own recruitment interns end to end — offer documentation, contract terms, joining coordination and pre-joining follow-through.
- Supported client acquisition and account growth from the outset, coordinating directly with hiring stakeholders across sales and operations mandates, and built candidate sourcing workflows for EdTech and SaaS client requirements.

codeIAM Club, Andhra University | Community Relations Lead *Apr 2025 – May 2026*

- Spearheading inter-club collaboration initiatives and fostering community engagement.

Caarya | Business Development Manager (Internship) *Jan 2025 – Dec 2025*

- Built and managed the campus partnership channel, establishing institutional relationships with universities and student bodies to create a recruitment pipeline for partner organisations.
- Achieved a 35% pipeline conversion rate and a 50% increase in partner onboarding through structured outreach and account management.
- Created TISA (The Indian Startup Alphabet), an employer-branding interview series documenting partner organisations' employee value propositions; authored the interview framework covering hiring philosophy, ideal candidate profile and workplace culture.

codeIAM Club, Andhra University | Cybersecurity Chapter Lead *Apr 2024 – Mar 2025*

- Led the Cybersecurity chapter; organised student summits and the Codeiam Spark Nation Hackathon.

IIT Bhubaneswar | Software Testing Intern *May 2024 – Jul 2024*

- Evaluated and validated academic software systems; designed test cases and automation documentation.

Techno Hacks | Cybersecurity Intern *Jul 2024 – Aug 2024*

- Performed network sniffing (Wireshark), port scanning (Nmap), and OSINT gathering (Maltego).

PROJECTS

AgentSentry — Non-Human Identity & AI Agent Risk Scanner **[Open Source]**

Python · AWS IAM/S3/Lambda · NetworkX · Pydantic · CISA KEV · Next.js · TypeScript · Vercel · GitHub Actions

Cloud accounts are full of identities nobody owns — service roles, stale API keys, and now autonomous AI agents with write access to production. AgentSentry finds them and ranks them by what an attacker would actually reach through each one.

- Open-source CLI that discovers non-human identities across AWS IAM roles, users, S3 buckets, and Lambda functions, plus static analysis of LangChain/CrewAI/AutoGen code to surface autonomous agents.
- Designed the P×R×E×A risk model (Privilege × Reachability × Exposure × AI-Amplification) — the AI-Amplification Factor quantifies how agent autonomy, blast radius, and irreversibility multiply compromise impact.
- Enriches findings against 1,610 CISA Known Exploited Vulnerabilities, flagging the 325 tied to active ransomware campaigns.
- NetworkX attack-graph engine computes blast radius per identity and renders an interactive HTML visualisation of lateral-movement paths.
- Surfaced 2 CRITICAL findings on a live AWS account during validation; ships with a pytest suite, GitHub Actions CI, and a Next.js product site.

CityBus Live — Real-Time Urban Bus Tracking **[Research Paper]**

Flask-SocketIO · WebSocket · Azure App Service · PostgreSQL · Leaflet.js · HTML5 Geolocation API · PWA

Most city bus routes in India have no live tracking — not because the tech doesn't exist, but because dedicated GPS hardware costs ₹15,000 per vehicle. CityBus Live eliminates this by repurposing the driver's own smartphone as the tracker, delivering real-time ETAs to commuters via a PWA at zero hardware cost.

- Hardware-free city bus tracking framework deployed live on 4 Visakhapatnam routes (28A, 6K, 400K, 400E).
- Repurposes drivers' existing smartphones via HTML5 Geolocation + WebSocket Pub/Sub — zero hardware cost per bus (saves ₹15,000/vehicle).
- 287 ms average end-to-end latency, 500+ concurrent WebSocket sessions, 99.8% traffic reduction vs HTTP polling.
- Five-layer security architecture; 100% SQL injection blocked at Cloudflare WAF edge (sqlmap verified).
- Authored the accompanying IEEE-format research paper covering the framework design, latency benchmarks, and five-layer security architecture.

Cybersweep

Python · Nmap · Security Analytics · Automation

A Python-powered recon toolkit that automates the early stages of a pentest — scans ports, fingerprints services, and assembles a structured threat report in a single run.

lankaabhiram16@gmail.com · 9556925563 · github.com/Abhiram-ops

Web Application Vulnerability Scanner

Python · Requests · BeautifulSoup · OWASP Top 10

Point it at a target and it systematically checks for the most common web vulnerabilities across the OWASP Top 10, then generates a detailed remediation report — no manual probing needed.

LeadFinder – Smart Lead Scraping Tool

Python · SerpAPI · BeautifulSoup · Regex

A sales automation tool packaged as a standalone .exe that scrapes job boards and company pages to extract validated leads — built to cut manual prospecting time to near zero.

E-Attendance using QR & OTP

Flask · MySQL · QR Code · OTP · Python

Built to close the proxy attendance loophole: students must scan a time-limited QR code and verify a one-time PIN before attendance is logged, making impersonation practically impossible.

RESEARCH PUBLICATIONS

CityBus Live: A Hardware-Free, Universally Deployable Real-Time Urban Bus Tracking Framework Using Browser-Based GPS and WebSocket Communication

- Authored IEEE-format research manuscript — hardware-free tracking framework, WebSocket pub/sub architecture, and five-layer security model, validated on a live 4-route deployment.
- AgentSentry: A Risk Quantification Framework for Non-Human Identities and Autonomous AI Agents — authored IEEE-format manuscript introducing the AI-Amplification Factor.

CityBus Live — First Author: Abhiram Lanka | Co-authors: Manisha Panda, Dr. Bharati Bidikar (Research Supervisor, Andhra University)

CERTIFICATIONS

- **Foundations of Cybersecurity** — Google · Coursera | May 2026
- **REMAC+** — Udemy | 2024
- **Business Ethics** — NPTEL · IIT | Apr 2026

EDUCATION

B.Tech in Computer Science Engineering *2022 – 2026*

Andhra University College of Engineering, Visakhapatnam

Higher Secondary School (MPC) *2020 – 2022*

St. Xavier International School, Bhubaneswar

ACHIEVEMENTS & LEADERSHIP

- Creator & Maintainer, AgentSentry — open-source NHI and AI-agent risk scanner (github.com/Abhiram-ops/agent-sentry).
- Cybersecurity Chapter Lead, codeIAM Club — Spearheaded student summits and security workshops at Andhra University.
- Organising Committee Member, Codeiam Spark Nation Hackathon.
- 1st Prize — ABVP Event (Andhra University, 2024).
- Attendee, BSides Vizag 2025 Cybersecurity Conference.
- Participant, 43rd State Conference (2025) — Andhra University College Ground.
